DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20 drawn to a cassette apparatus for medication dispensing, classified in class 700, subclass 242.
 - II. Claims 60-66 drawn to a medication distribution and information system, classified in class 700 subclasses 244. -
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transporting medicaments between locations. See MPEP § 806.05(d). In the instant case, invention II has separate utility such as dispensing medications to patients. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. No claims appear to be linking claims.
